STEM Mindset

"Innovation Academy ensures PBLs and STEAM remain a focus by providing ongoing professional development and planning sessions. Feedback from all stakeholders is used to enhance and refine best practices."

Dr. Grant Bell, Principal

Data Driven

"Innovation Academy tracks data points from universal screeners, benchmark tests and standardized assessments. There has been a marked increase in core content areas since implementation of inquiry-based curriculum with a STEAM focus."

Dr. Grant Bell, Principal

PBL Spotlight

"Sixth graders recently completed an Alternative Energy PBL. They collectively researched alternative energy sources and became field experts in developing a presentation for their mock energy company. They used the engineering design process to build a model house and provide its power through their alternative energy source."

Dr. Grant Bell, Principal

Utilizing the Rubric

"The rubric has supported teachers in implementing quality education through STEAM while using instructional technology and project-based learning. It allowed our school to reflect deeply on its strengths and develop actionable steps for areas of improvement."

Dr. Grant Bell, Principal

Stakeholders are Key

"Our community partners/ stakeholders are consistently involved by supporting quarterly project-based learning tasks. Innovation Academy welcomes our partners to be active participants through family engagement opportunities, guest speaker visits, hands-on activities, off-campus field experiences, etc."

Dr. Grant Bell, Principal
