Stakeholder Mindset

"We have several community and industry leaders that serve as long term partners. They help provide funds, speakers, and field trip opportunities. They serve as judges on numerous STEM competitions as well."

Lynn Garner, Principal

Teacher & Student Voice

"We require teachers to document evidence of PBLs throughout the year using Google Drive. There is a google drive folder for each individual student that contains pics and evidence of all the PBLs the student has completed from sixth through eighth grade."

Lynn Garner, Principal

STEM Mission

"Our mission statement emphasizes work ethic and respect. Our motto is "work ethic + respect = Success". We have this displayed throughout the school. We also have the students say this every morning on the PA system before the pledge."

Lynn Garner, Principal

Creating Culture that Matters

"We feel that learning has become the focus more than just grades. It has created an environment that emphasizes work ethic based on the Engineering Design Process. Students feel free to make mistakes and learn from those mistakes to improve. We also that feel the level of respect has risen throughout the student body. We feel the emphasis on teamwork through project-based learning has really helped."

Lynn Garner, Principal

Data Matters

"We have achieved level 5 growth for 3 consecutive years. Our extracurricular involvement has increased by over 60%. Our school attendance has improved. School discipline has declined."

Lynn Garner, Principal
